

"I Am Going to Buy a New Bed To-day"

—announced a woman who recently came into our store.

"I have just finished the spring house-cleaning, but my bed is so shabby that it spoils the whole room—

"Can you show me something moderate in price, that is really substantial and good looking?"

We asked her to name the dominant color scheme in her room. Then we showed her one of the new Simmons enameled steel beds, which had just arrived—a bed which exactly harmonized with the decorations in her bedroom.

"Why," she said, "this is the bed I've read about in the magazines!"

We called her attention to the massive tubing and solid construction. We explained how the handsome appearance of the enamel was due to the manner in which it was flowed onto the steel—four separate coats—and then to the thorough baking it received.

We demonstrated how this hollow-tempered steel tubing made the bed one-third lighter than the old style enameled iron beds. How this difference in weight meant unmarred floors and no injury to rugs. We showed how the Simmons frictionless casters made the bed easy to move.

We took her through the entire stock of beds—showed her brass beds—in both satin and bright finish—steel beds with natural wood finish—spotless white beds—and a host of new shapes and styles.

But this woman came back to the first bed and bought it.

Is your home in need of a handsome, comfortable bed at a low price? If so, see us this week. We can please you, no matter how particular you may be.
